PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of experience specializing in high-performance web applications using **React.js** and **Next.js**. Proven expertise in architecting **scalable UI systems**, leading **cross-functional teams**, and integrating **AI solutions (LLM APIs)** to enhance engagement.

PROFESSIONAL EXPERIENCE

12/2022 - Present	● Senior Software Engineer Shikho Technologies Bangladesh Ltd A technology company focused on enhancing learning experiences through digital platforms. • Spearheaded Bohubrihi development using Next.js and GraphQL, achieving a 40% improvement in site loading speed. • Architected a custom component library, reducing frontend development time by 30% for engineering teams. • Integrated LLM APIs and AI tools, improving developer productivity by 25% and enhancing user interaction. • Mentored 3+ junior engineers, maintaining code quality through PR reviews and standardizing Agile workflows.
11/2020 - 11/2022	● Front End Engineer Grameen Digital Health (Ex Telenor) of Grameen Telecom Trust A digital health service aimed at improving healthcare accessibility through technology. • Enhanced core web components for digital health, ensuring 100% mobile responsiveness across all platforms. • Migrating complex application state by migrating to React Context API, eliminating redundant re-renders and reducing application latency by 15%. • Integrated automated static code analysis, resulting in a 15% reduction in production bugs.
08/2019 - 10/2020	● Software Engineer Shohoz Ltd. A platform providing on-demand service for food, ticket and transportation. • Contributed to Shohoz Food Web using reusable React components, delivering 5+ major feature updates ahead of schedule. • Streamlined documentation using Storybook, which accelerated developer onboarding by 20%.
04/2018 - 07/2019	● Software Engineer Shimahin Limited A company providing web development and design services. • Standardized cross-browser performance by 95% across legacy and modern environments through automated multi-platform testing and custom CSS/JS polyfills. • Architected a scalable UI library of 10+ reusable components using React and Docz, driving a 25% increase in development velocity and team-wide architectural consistency.

TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, Ant Design (Antd), Material UI, Figma, Framer Motion.
Backend	Node JS, Express JS, MySQL, PostgreSQL, MongoDB
State & API	Redux, Zustand, RTK Query, Rest API, Context API, GraphQL.
AI	Cursor AI, Claude Code, Gemini CLI, MCP.
Tools	Component Documentation (Storybook , Docz), Headless CMS (Strapi , Apito), Prettier , ESLint , Package Manager (NPM , Yarn)
Leadership	Team Mentoring, Agile Methodology, Project Management.

EDUCATION

04/2014 - 01/2018

Dhanmondi - Bangladesh

- B.Sc. in Software Engineering (CGPA: 3.20)
Daffodil International University-DIU

KEY ACHIEVEMENTS

- 

Strategic Project Leadership

Spearheaded the end-to-end development and architectural transition of **Bohubrihi** (a premier Edtech platform) at Shikho, leading the team to achieve a **40% improvement** in site performance.
- 

Healthcare Ecosystem Collaboration

Led the technical collaboration with **Amar Lab** (a third-party diagnostics provider) at Grameen Digital Health to seamlessly integrate health e-commerce services, ensuring **100% mobile responsiveness** and accessibility.
- 

Enterprise-Level Integrations

Successfully orchestrated complex third-party service integrations at Shikho with major industry players, including **Ami Probashi**, **Grameenphone (GP)**, and **bKash**, expanding platform utility and user reach.
- 

High-Impact Individual Contribution

Individually executed over **80% of the Shohoz Food Web** service development, delivering major feature updates ahead of schedule and accelerating developer onboarding through standardized documentation.

PROJECTS

Pregnancy Tracker – Vibe Coding

Comprehensive Health Tracking Web App

Live Link: <https://rb.gy/fe44zz>

Source Code Link: <https://rb.gy/uvzuwv>

- Achieved user engagement growth of 55% by developing a health-tracking application with Next.js to monitor milestones.

Blood Reach

Emergency Blood Donation Connector

Live Link: <https://rb.gy/d0u2ct>

Source Code Link: <https://rb.gy/8qbd41>

- Enhanced real-time connectivity, resulting in a 35% increase in donor engagement, by deploying a Next.js platform.
- Integrated real-time data fetching that reduced donor-matching time by **30%** for emergency life-saving resources.

Shikho Shop

E-commerce Platform

Live Link: <https://rb.gy/l6ngqi>

- Built a dynamic e-commerce application using **Next.js**, **TypeScript**, and **Tailwind CSS**, focusing on a **100% responsive** shopping experience.
- Implemented **reusable UI components**, which accelerated feature deployment time by **20%** and ensured brand consistency.

Bohubrihi

Leading skill-learning platform in Bangladesh.

Live Link: <https://rb.gy/fus7nm>

- Engineered high-performance features for a premier Edtech platform utilizing **Next.js**, **GraphQL**, and **Apollo Client**; boosted page load speeds by **40%** via custom server-side caching strategies.
- Boosted discoverability and Core Web Vitals by achieving a **90+ Lighthouse score**, leveraging **SSR (Server-Side Rendering)** and **semantic HTML** to drive organic traffic growth.

Money Management Web App - MERN Stack

A web application for managing finances.

Source Code Link: <https://rb.gy/lvxkvz>

- Improved user financial control by 45% by developing an app that categorizes income and expenses.
